ABOUT ME

Full-stack developer with 4+ years of experience building content-driven products, including a publishing and community platform at T2 World and a live e-commerce platform that I maintain as the sole developer. Strong in React, Next.js and TypeScript, with hands-on backend experience in KeystoneJS, Prisma and PostgreSQL. Built a REST API with Java 21 and Spring Boot for a personal travel-planning app.

LANGUAGES

Polish - native
English - fluent

SKILLS

Languages & Core: TypeScript, JavaScript, Java 21, SQL, HTML, CSS
Frontend: React, Next.js, Tailwind CSS, Apollo Client, Redux Toolkit, React Hook Form, Sass, Storybook
Backend & Data: Spring Boot, REST, GraphQL, KeystoneJS, Prisma ORM, PostgreSQL, Flyway
Testing & Tooling: Jest, JUnit 5, Mockito, Testcontainers, Cypress, Git, GitHub, GitLab CI, Docker
Platforms: Railway, Cloudflare, Cloudinary, Figma

EXPERIENCE

MIUKI.PL – FREELANCE FULL-STACK DEVELOPER
12.2021– PRESENT

- Co-developed and launched an **e-commerce platform** with a catalog of about 100 products and a blog of 36 published articles, serving 20k+ active users a year. Now maintain and extend its frontend and backend as the sole developer.
- Develop the frontend using **Next.js, React, TypeScript and Tailwind CSS**, building responsive pages, reusable components and new features for a store where 53% of users browse on mobile.
- Built a blog and content publishing workflow with **KeystoneJS** and maintain backend functionality and **GraphQL** integrations.
- Maintain production deployments on **Cloudflare and Railway**, troubleshooting issues, and keeping the platform stable through seasonal traffic peaks.
- Implement technical SEO and crawler management requirements in collaboration with the SEO team, including maintenance of a sitemap containing 177 URLs.

T2 WORLD – FRONTEND DEVELOPER
07.2022 – 01.2025

- Developed frontend features for a publishing and community platform, including **Territory** (content and community views for articles and short form Prompts) and reusable components, using **React, Next.js, TypeScript and Tailwind CSS**.
- Extended KeystoneJS data models with new fields and relationships and created and applied Prisma migrations on PostgreSQL. Integrated these changes into the frontend using GraphQL and Apollo Client, collaborating with backend developers on larger API changes.
- Contributed to the Prompts feature by implementing reply flows based on authentication and Territory membership, along with time-limited states.
- Built promotional banners in collaboration with the marketing team.
- Took part in sprint planning with the Product Manager, UI/UX Designer, and other developers.

NITRO DIGITAL LTD – FRONTEND DEVELOPER (INTERNSHIP)
09.2021 – 12.2021

- Converted **Avocode** designs into a landing page using **Sass**.
- Collaborated with senior developers and followed the team's GitLab CI workflow.
- Adapted page layouts and styling to different screen sizes.

PROJECTS

ROUTETRIPPER.COM – TRAVEL PLANNER
GitHub: Backend | Frontend
Travel-planning app with an AI chat for trip suggestions and Google Maps route planning.

- Built a REST API using Java 21, Spring Boot, PostgreSQL, and Flyway, with unit tests (JUnit 5, Mockito), integration tests (Testcontainers), and E2E tests (Cypress).
- Secured endpoints by validating JWTs issued by **Clerk**.
- Implemented image uploads with file type and size validation and Cloudinary storage.
- Enforced backend usage limits for Google Maps route requests and AI chat.
- Built the **Next.js 15 frontend** and deployed the API and PostgreSQL database on **Railway**, configuring a custom domain for the API.

EDUCATION

UNIVERSITY OF WEST LONDON - BACHELOR OF SCIENCE
2017 – 2021
Computer Science, 1st Class Honours
